

## УРОК 24

Тема уроку. Досліджуємо задачі на знаходження суми трьох доданків

$$9 + 6 = \overbrace{9 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$11 - 2 = \overbrace{11 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$11 - 7 = \overbrace{11 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$8 + 3 = \overbrace{8 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$8 + 7 = \overbrace{8 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$9 + 2 = \overbrace{9 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$12 - 5 = \overbrace{12 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$17 - 9 = \overbrace{17 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$7 + 4 = \overbrace{7 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$7 + 6 = \overbrace{7 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$14 - 5 = \overbrace{14 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$14 - 9 = \overbrace{14 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$9 + 5 = \overbrace{9 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$9 + 7 = \overbrace{9 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$12 - 4 = \overbrace{12 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$12 - 6 = \overbrace{12 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$8 + 6 = \overbrace{8 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$11 - 4 = \overbrace{11 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$11 - 8 = \overbrace{11 - \square}^{10} - \square = 10 - \square = \square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$

$$6 + 5 = \overbrace{6 + \square}^{10} + \square = 10 + \square = \square\square$$

$$\begin{array}{c} \swarrow \searrow \\ \square + \square \end{array}$$
