

УРОК 33

Тема уроку. Досліджуємо дві послідовні задачі

I варіант	II варіант	III варіант	IV варіант
$11 = \square + 3$	$10 = \square + 6$	$12 = \square + 5$	$13 = \square + 6$
$15 = \square + 6$	$11 = \square + 5$	$15 = \square + 7$	$11 = \square + 2$
$12 = \square + 3$	$14 = \square + 5$	$11 = \square + 6$	$15 = \square + 8$
$14 = \square + 9$	$11 = \square + 4$	$14 = \square + 8$	$12 = \square + 6$
$11 = \square + 8$	$15 = \square + 9$	$11 = \square + 9$	$11 = \square + 7$
$13 = \square + 7$	$12 = \square + 4$	$13 = \square + 5$	$14 = \square + 6$
$12 = \square + 8$	$10 = \square + 5$	$12 = \square + 7$	$13 = \square + 8$
$16 = \square + 7$	$13 = \square + 4$	$14 = \square + 7$	$16 = \square + 9$
$13 = \square + 9$	$18 = \square + 9$	$16 = \square + 9$	$12 = \square + 9$
$17 = \square + 8$	$10 = \square + 1$	$17 = \square + 9$	$8 = \square + 1$

I варіант	II варіант
$17 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$12 - 4 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$12 - 3 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$13 - 5 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$15 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$11 - 7 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$11 - 2 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$14 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$16 - 9 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$15 - 9 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$11 - 3 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$16 - 7 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$14 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$12 - 5 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$15 - 7 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$11 - 4 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$13 - 6 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$14 - 6 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
$16 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$	$13 - 8 = \square$, оскільки $\square + \square = \square\square$ $\square + \square$
