

УРОК 27

Тема уроку. Використовуємо переставний закон додавання

$$9 + 6 = [9 + \square] + \square = \square\square + \square = \square\square$$

$$16 - 8 = [16 - \square] - \square = \square\square - \square = \square$$

$$7 + 7 = [7 + \square] + \square = \square\square + \square = \square\square$$

$$13 - 7 = [13 - \square] - \square = \square\square - \square = \square$$

$$6 + 6 = [6 + \square] + \square = \square\square + \square = \square\square$$

$$8 + 7 = [8 + \square] + \square = \square\square + \square = \square\square$$

$$8 + 5 = [8 + \square] + \square = \square\square + \square = \square\square$$

$$11 - 9 = [11 - \square] - \square = \square\square - \square = \square$$

$$9 + 7 = [9 + \square] + \square = \square\square + \square = \square\square$$

$$6 + 6 = [6 + \square] + \square = \square\square + \square = \square\square$$

$$14 - 8 = [14 - \square] - \square = \square\square - \square = \square$$

$$11 - 9 = [11 - \square] - \square = \square\square - \square = \square$$

$$7 + 6 = [7 + \square] + \square = \square\square + \square = \square\square$$

$$17 - 8 = [17 - \square] - \square = \square\square - \square = \square$$

$$9 + 5 = [9 + \square] + \square = \square\square + \square = \square\square$$

$$13 - 6 = [13 - \square] - \square = \square\square - \square = \square$$

$$8 + 6 = [8 + \square] + \square = \square\square + \square = \square\square$$

$$11 - 7 = [11 - \square] - \square = \square\square - \square = \square$$

$$6 + 6 = [6 + \square] + \square = \square\square + \square = \square\square$$

$$12 - 9 = [12 - \square] - \square = \square\square - \square = \square$$

$$13 - 8 = [13 - \square] - \square = \square\square - \square = \square$$

$$8 + 8 = [8 + \square] + \square = \square\square + \square = \square\square$$

Щоб до більшого числа додати менше, треба поміняти місцями доданки.
